## ● WORK EXPERIENCE

### React | React Native Developer EDGE-APPS

 07/2022 –05/2023  KAZAKHSTAN

- Developed components, routing, various services and screens. Interact with their dirty apps and APIs.
- Development and support of company services using Typescript and MobX.
- Developed mobile cash registers that help businesses conduct cash transactions without special equipment. If you have a mobile phone - this will be enough. You can also make non-cash transactions if your phone has NFC.
- Developed a scanner that helps businesses conduct transactions using a QR code.
- Developed experiments using firebase AB test
- Developed a real-time location tracking application using React Native and React Native Maps.
- Created Native Modules in React Native using Java and Swift.
- Built the architecture of the web application in accordance with the principles of MVC based on React Native and Redux
